About Hartung Dallas

Hartung Glass Industries - Dallas

Ranked as a top North American glass fabricator by Glass Magazine, Hartung Glass Industries is one of the fastest growing, most dynamic, total service glass fabricators in North America. Celebrating over 90 years of continuous operations in the glass industry, HGI Dallas houses some of the industry's newest and most technologically advanced tempering and glass fabrication equipment.

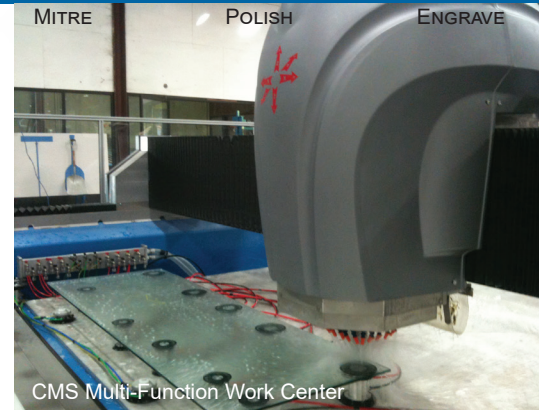

MULTI-FUNCTION WORK CENTER

Hartung Dallas and Agalite Pueblo are now home to two new CMS Multifunctional NC Work Centers. Each work center includes multi-axis capability and automatic tool change for milling, edging, engraving and bevelling. These state-of-the-art machines also include a patented sixth axis for shape bevelling and polishing the most complicated shapes, notches and inside cutouts that that you can imagine.

Not only are these intelligent workhorses great for heavy glass fabrication such as hinges and shape polishing, their engraving and etching capabilities are outstanding. Potential applications include logos, addresses, names, and decorative face bevelling.

What this means for Hartung/Agalite partners is a faster turnaround with more fabrication options and a higher quality finished product.

GLASTON RC350/RC200 DOUBLE BAY TEMPERING FURNACE

Recognized as a world leader in producing quality glass with minimal energy consumption, the Glaston furnace at Hartung Dallas changes the rules of fabrication and takes glass quality to a totally new level while enabling new products.

With its 94" x 180" max load size (12x12 min) the furnace includes Glaston's unique air flotation technology which gives HGI quality and processing results that are impossible to reach with other tempering furnaces.

By supporting and heating the glass on a bed of air, GlastonAir opens up brand-new business opportunities for Hartung customers.
